## Another Step Toward Permanent Peace

Throughout the years of the Great War, the people of the allied nations were repeatedly told that it was a war to make the world safe for democracy, "a war to end war." And when at last the great struggle ended and the League of Nations came into being it was thought that, with the bitter experience of the war fresh in all minds, there would be little hesitation on the part of any country to join the League, and that, with 100 per cent. world membership in the League, world disarmament would follow in due course.

The refusal of the United States to have anything to do with the League of Nations—the very country in which the idea originated—came as a rude shock to all lovers and advocates of peace. It discouraged Europe, re-awakened all the old fears, and actually led to renewed activity in the piling up of armaments. Nevertheless, the League struggled on, gaining new adherents, and, with each succeeding session in settling international disputes and preventing open ruptures, the League grew in strength and prestige. Nonetheless, so long as the United States remained aloof it was felt that the structure for world peace was imperfect and insecure.

Because of this fact, the recent action of Mr. Kellogg, United States Secretary of State, in inviting the nations of the world to enter into a multilateral treaty to outlaw war, was enthusiastically welcomed by all lovers of peace, and nowhere quite so heartily as in Canada and other parts of the British Empire.

Already fifteen nations, including, with the exception of Russia, all the Great Powers, have signified their willingness to sign such a treaty. The draft of this momentous international document is brief and to the point, and, as it may well prove to be the Magna Charta of world peace, it is worthy of the widest possible reproduction in order that all people, everywhere, may read it. The preamble, in part, is as follows:

"Deeply sensible of their solemn duty to promote the welfare of mankind;

"Persuaded that the time has come when a frank renunciation of war as an instrument of national policy should be made to the end that the peaceful and friendly relations now existing between their peoples may be perpetuated;

"Convinced that all changes in their relations with one another should be sought only by pacific means and be the result of a peaceful and orderly process, and that any signatory power which shall hereafter seek to promote its national interests by resort to war should be denied the benefits furnished by this treaty;

"Hopeful that, encouraged by their example, all the other nations of the world will join in this humane endeavor, and by adhering to the present treaty as soon as it comes into force, bring peoples within the scope of its beneficent provisions, thus uniting the civilized nations of the world in a common renunciation of war as an instrument of their national policy;"

Then follows the names of the fifteen nations who have signified their willingness to sign such a treaty, namely: Australia, Belgium, Canada, Czechoslovakia, France, Germany, Great Britain, India, Irish Free State, Italy, Japan, New Zealand, Poland, South Africa, United States of America.

To what do they agree? Having approved the declarations in the preamble quoted above, they bind themselves as follows:

"Article I. The high contracting parties solemnly declare in the names of their respective peoples that they condemn recourse to war for the solution of international controversies, and renounce it as an instrument of national policy in their relations with one another.

"Article II. The high contracting parties agree that the settlement of all disputes or conflicts of whatever nature or of whatever origin they may be, which may arise among them, shall never be sought except by pacific means.

"Article III. The present treaty shall be ratified by the high contracting parties named in the preamble in accordance with their respective constitutional requirements and shall take effect as between them as soon as all their several instruments of ratification shall have been deposited at Lausanne.

"This treaty shall, when it has come into effect as prescribed in the preceding paragraph, remain open as long as may be necessary for adherence by all the other powers of the world. Every instrument evidencing the adherence of a power shall be deposited at ( ), and the treaty shall immediately upon such deposit become effective as between the power thus adhering and the other power parties hereto.

"That is the whole document, beautiful in its simplicity, momentous in its sweeping renunciation of war under any and all circumstances. It does not replace the League of Nations, but adds power and strength to it. No loopholes are left, and should any nation sign this treaty ever again resort to war it would become, as never before, an outlaw among the nations.

### Substitutes Cards For Pistol

Affair Of Honor In Czechoslovakia Settled In New Way

Pistols have given way to cards in the settlement of "affairs of honor" in Czechoslovakia, judging by the method adopted by a business man at Brunn, near Prague, to avenge an insult.

An engineer in the town is said to have given offence to a duel man, who challenged him to a duel.

The duelists came to rest on top of a coach for a period of few seconds—long enough to effect the transfer of a pouch of mail without difficulty.

The army blimp which was the test carried a crew of six men.

The army blimp which was the test carried a crew of six men.

The army blimp which was the test carried a crew of six men.

### A Wonderful Performance

Recent Flight Over Pacific Was Great Achievement For British

The great flight over the Pacific Ocean by the Australian, Captain Kingsford-Smith, leader, and his companions, puts British prestige at the peak in this form of endeavor. The "Southern Cross" winged its way to fame under control of four men, each performing an essential task in making the trip practically safe and sane. This feature alone makes the Pacific flight out of the category of regular daredevil stunts and enhances notably the merit of the performance. Regular radio reports received from the Southern Cross during its flight robbed the journey of some sensational features beloved of the crowd, but detracted not a bit from the glory won by the fliers. Their accomplishment is the more valuable because they made use of every possible device to combat the fury of the elements with man's most powerful weapons.

### HOW DELICATE GIRLS ARE MADE STRONG

Rich, Red Blood Needed To Keep Up Their Vitality

It should be borne in mind that pale, bloodless girls need plenty of nourishment, plenty of sleep and regular out-of-door exercise. But lack of appetite and tired, aching limbs lead to higher blood. To have the weak, thin-blooded suffer, the nurse must take care of this kind as well as Dr. Williams' Pink Pills. These pills will build up the blood and increase the blood supply, they help the body in an unusual condition. I was very thin and nervous and had no appetite and had no desire to live. I was the doing of those of my age. My mother got tone after tone for me, but they did me very little good. Then Dr. Williams' Pink Pills were recommended almost from the first they seemed to be just what was needed to restore my strength.

After taking the pills for a time I felt an altogether different girl. I got up in the morning, felt the best and active, and ready for work or play. Since then I have felt the best of health and am now a strong girl.

The couple who wrote Dr. Williams' Pink Pills in the spring as a tonic for the blood. I have felt the best of health and am now a strong girl.

The Sioux Lookout Map Sheet

Where the Miner's Pick No Displaces the Tomahawk

The Sioux Indians were among the handiest as well as the most warlike of the aboriginal inhabitants of North America.

Their memory is perpetuated in the Sioux Lookout map sheet of the National Topographic series, now issued from the press of the Topographical Survey of Canada.

The new map embraces an area lying 150 miles north from Lake Superior and adjoining the Lac Seul map sheet on the west.

The town of Sioux Lookout gets its name from the precipitous hill overlooking it. From the top of the hill, in days gone by, the Ojibways would have seen, kept watch up and down the waterway from raising Sioux.

On one occasion the lookout alert and the Sioux fell upon the camp, they tomahawked the warriors to a man, and destroyed all the canoes.

The women and children with one exception did not survive. The women and children were marooned upon an island near the site of the present town, and there they starved to death. The island is still called "Sioux Island."

This country with its broken lakes and streams, teeming with fish and game, and its rich mineral resources, is a tourist's paradise. Here are old trading posts like Osageburg House, founded over a century ago.

At historic Lac Seul, the estate of the Hudson's Bay Company has a four-hole golf course. (Ingress to the region is by way of the Canadian National Railways and thence by numerous connecting waterways with launches, tugs, or canoes.)

This territory is part of the newly discovered mineral horizons, emphasized on the area known as the great Canadian shield.

The Sioux Lookout map sheet of the National Topographic series, on the scale of four miles to the inch, may be obtained in sheet form from the National Topographic Department of the Interior, Ottawa, for the nominal fee of 25 cents. If desired in folder form or linen backed the fee is 50 cents.

For Both House and Stable, There is a good deal of similarity physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and is happily for both human beings and the lower orders of animals.

A Great Germ Carrier Common Housefly Covered With Deadly Disease Germs Says Scientists

The common housefly is literally covered with bacteria and disease germs. Scientists have estimated that many flies carry as many as 4,000,000 germs. This estimate is based on the following: A fly is placed in a small bottle of water. The bottle of water is then shaken so that the germs will all be washed off the fly, and they will be equally distributed throughout the water. A tiny drop, perhaps a millionth part of the water is then placed on a glass slide and examined under a powerful microscope. The scientist counts the number of bacteria visible on the slide. He then multiplies the six by 1,000,000, since there are about 1,000,000 such drops in the bottle, and the result is that the fly carried 4,000,000 bacteria.

Many, the native language of the Isle of Man, is dying out; fewer than 1,000 of the island's 50,000 inhabitants have now any working knowledge of it.

### France Has Too Much Coal

Production Rises Until There Is No Need To Import

France, desperately short of coal for ten years, and always an importer, now has too much of it. For the first time French production equals consumption and imported coal is threatening to break the market.

When the Germans flooded French coal mines in the north during the World War, France lost half of her fuel and it has been a long time to get back to normal. Not only was the pre-war figure of 40,000,000 tons annually reached, but last year it went up to 60,000,000 and the Saar Valley has added another 15,000,000 tons.

All European coal mines have been working hard since the war because British strikes, the occupation of the Ruhr and the trouble in Upper Silesia created big shortages. Now that all are at work, Europe, according to French figures given to the League of Nations recently, has a surplus of 60,000,000 or 70,000,000 tons a year.

As all countries for generations have looked to France as an importer of coal, they all still try to capture the market there, ignoring the fact that France now mines all the coals it needs. Therefore the French coal operators are puzzling how to reduce costs; curtail production and restrict imports so coal won't become too cheap.

## The Consumers' League Has Now Become An Incorporated Company

Ottawa.—The Consumers' League of Canada, whose activities before the Tariff Advisory Board have been conducted by R. V. Deschamps, and whose personnel has always been vaguely defined in political circles here as "some western M.P.'s," has now become an incorporated company and the notice of this is contained in the current issue of *The Canada Gazette*.

The "Western M.P.'s" who are sponsoring the organization are C. E. Belliveau (Liberal, Swift Current); A. K. Totter (Liberal, Humboldt); George Spence (Liberal, Maple Creek); and E. J. Young (Liberal, Weyburn). President of the league is W. C. Murray, of Saskatoon.

The aims of the Consumers' League of Canada are set forth as follows:

(a) To consider and discuss all applications made to the board of tariff taxation and other related matters, otherwise known as the tariff advisory board, and to oppose and resist any applications which may be calculated to change the tariff laws that the public generally will be detrimentally affected by.

(b) To procure information concerning tariffs and the effect of same on industries concerned and the public generally, and for such purpose and in order to lay such information before the tariff advisory board to maintain representation before such board at all its sittings.

(c) To consider, originate and support applications to the said tariff advisory board for changes and adjustments in the tariff laws which such changes or adjustments are deemed to be in the public interest.

(d) To obtain and receive contributions of money for the purpose aforesaid.

(e) To subscribe to, become a member of and co-operate with any other association whereby incorporating or not whose objects are not altogether or in part similar to those of this association, and to procure from and communicate with any such association such information as may be likely to forward the objects of this association.

The operations of the corporation "to be carried on without share capital throughout the Dominion of Canada and elsewhere by the name of 'the Consumers' League of Canada,' and the chief office of the said corporation to be at the city of Ottawa, in the province of Ontario."

### Initiation Strike At Antwerp Made Real

Dock Workers Turned Job Into Real Thing

Antwerp, Belgium.—An initiation strike turned out to be a real one, with 17,000 dock workers calling off work in the harbor of Antwerp and refusing to listen to the pleas of the shippers to return to their jobs. The affair started out as a joke.

Two Communists bicycled around the harbor, telling the surprised dockers that the union had declared a strike to get a raise of 10 francs (40 cents) a day. The union officials immediately decided to make the strike a real thing.

## Customary Pension For Retiring Speaker Is Opposed By Labor

London.—The customary pension of \$29,000 for retired speakers of the House of Commons was attacked in the House by the Labor Party, when Premier Stanley Baldwin moved a resolution granting the pension to Rt. Hon. J. H. Whitley.

The official Labor Party amendment moved by Rt. Hon. J. H. Whitley was that the pension should be reduced to \$22,000.

The resolution favoring the customary pension was then passed. Mr. Whitley complained that the Labor amendment was not any attempt to minimize the value of Whitley's services as a speaker. He thought there existed a real case for revision of the emoluments attached to the speakership, in view of the heavy expenses in connection with the office. He proposed, however,

### Suggests New Subject For School Study

Alberta Premier Thinks Co-Operative Marketing Should Be Taught

Edmonton, Alta.—Spreading of the gospel of co-operative marketing in public and high schools of this province was favored by Premier Brownlee during his address at the banquet tendered to the Alberta Institute of Co-operation by the Alberta Wheat Pool, presided over by Henry Wise Wood, chairman of the provincial wheat pool.

Premier Brownlee declared that there should be a place for such teachings in the public and high schools of this province. Devoting of certain pages of text books to this subject would not be enough, he said, as teachers and instructors should be inspired with a belief in co-operation and co-operative efforts. He indicated that the government was working towards this objective, and believed that it had the co-operation of all the pools.

### To Consider Kellogg Note

Japan Approves Of Latest Proposal To Outlaw War

Tokyo.—The foreign office spokesman says that Japan was in complete accord with the latest proposal of Frank B. Kellogg, United States Secretary of State, for treaty to outlaw war. The cabinet was expected to meet soon, to consider the Kellogg draft, after which a reply would be sent. The spokesman said the government believed the proposal treaty would ensure the peace of the world than any similar document in history.

### Will Tour West

Sir Henry Thornton Begins Tour Of C.N.R. Lines

Montreal.—Sir Henry W. Thornton, chairman and president of the Montreal-National Railways, has left Montreal on his annual inspection tour of the western lines and properties of the National system.

His inspection will take him through Northern Quebec and Ontario, the prairie provinces and to the Pacific Coast, and he will be away from Montreal during the month of July.

### All Murders Are Solved

London.—Twenty-seven murders were committed in London last year, all of which were solved, according to a report by the Police Commissioner. Twelve persons were charged and ten murderers committed suicide, while one died in an asylum. The value of property stolen was \$2,821,000. Property recovered amounted to \$100,000.

### Sail For Home

Southampton, Eng.—Miss Amelia Easthart, Wilmer Stultz and Louis Gordon, fresh from their cordial welcome given them in Great Britain after their flight across the Atlantic from Newfoundland, have sailed for the United States.

LAKE DROPPED TWO INCHES

An excellent official opening of the western lakes and rivers was made this spring when several guests of the Banff Springs Hotel commended a big motor bus, for the five-mile journey to Lake Minnewanka where several good catches were made.

The last spot left to G. Andrews, of Banff, who captured a thirty-pound lake trout after a long struggle. He lake trout after a long struggle. He dropped two inches when the trout had been landed.

### PLANS SPEAKING TOUR

Hon. R. B. Bennett, leader of the Federal Conservative Party, who is planning an extensive speaking tour of the dominion. This picture was taken just at the end of the session.

### Lord Plumer Vacating Post In Palestine

Has Held Position As Commissioner For Three Years

London.—Field Marshal Lord Plumer, who shortly vacates the high commission of Palestine, which he has held since 1925. The Daily Express, in an article from its Jerusalem correspondent, says that the retirement will be brought about by Lord Plumer's differences with the British colonial office over the division of the cost of the Trans-Jordan force as between the British, Egyptian and Palestine, Palestine having already a budget deficiency of \$5,000,000.

Lord Plumer commanded the second army during some of the most important operations of the Belgian front in the war, in some of which the Canadian forces took part. He was specially mentioned for good work in connection with railway and forestry battalions. Lord Plumer, who is 73 years old, as a matter of fact, had Canadians constantly with him during the war and he also commanded men from the Dominions in the South African war.

### Receives Promotion

Assistant—Robert Nelson Munroe, winning division commissioner of immigration for Western Canada, has been promoted to a post in the Dominion office at Ottawa, according to word received.

## Democrats Nominate Alfred E. Smith For Presidential Candidate

### Awarded Gold Medal

Royal Canadian Humane Society Grants Medal To Saskatchewan Man For Bravery

Hamilton, Ont.—Awards for bravery were announced by the Royal Canadian Humane Society here.

The gold medal, highest award in the society's gift, was granted to Albert J. Ewen, Riverhurst, Sask. Mr. Ewen was working as hired man on the farm of H. J. Skechee in February last, when hearing screams he rushed to the house to find Mrs. Skechee's clothing a mass of flames and the house on fire from a gasoline explosion. He wrapped her in a blanket, suffering terrible burns himself, carried her to safety and then returned to rescue three children. He then took the family car and drove over the prairie with the insensible woman to get help. The car broke down and he carried her until he fell insensible. The woman died later and Ewen was taken to the hospital in Moose Jaw, from where he was discharged three weeks ago.

Bronze medals went to Vernon Johnson, Dore Lake, Sask.; Harry Tupper, Vancouver, B.C.; Harry Stephens, Kamloops, B.C.; and Agnes McLean, Fernie, B.C.

### Wrong Man Executed

Tragic Miscarriage Of Justice Reported From Germany

Berlin.—"We therefore have no doubt that this unfortunate man was condemned to death and executed for a murder which he was completely innocent."

This is the sensational statement with which the Mecklenburg-Stettin Ministry of Justice confessed to a shocked public a miscarriage of justice, which is described by Berlin newspapers as the most terrible in German history within the last 50 years.

The announcement was accompanied by the dramatic disclosure that four men on whose evidence the prisoner had been condemned have been arrested and have confessed that they themselves committed the crime, in which this innocent man had suffered death.

### Celebrates Anniversary

London.—The Duke of Connaught, former Governor-General of Canada, celebrated the sixtieth anniversary of his entry into the army by entertaining the members of the army council, the Duke, who recently observed his 78th birthday, enjoys wonderful health and fulfills a constant series of public and social engagements, although he has eliminated evening engagements.

## Co-Operative Union Wants Wholesale Society To Cover All Of Canada

Lloydminster, Sask.—By a unanimous vote the congress of the Co-operative Union of Canada in session here, went on record as being of the opinion that the time had arrived for the establishment of a wholesale society covering the whole of Canada. This is set out in a resolution passed which invited urged co-operative wholesale societies to attach an official to their Montreal and Winnipeg delegations who will assist in the development of the movement in Canada.

Another resolution was approved, providing for the appointment of a committee to investigate the practicability from the view point of economics, of a Canada-wide wholesale society, an organization for the three prairie provinces only, as well as other factors having a direct bearing on the whole question of consumer co-operation.

All co-operative marketing organizations throughout the Dominion will be issued a definite invitation to affiliate with the Co-operative Union of Canada. The importance of having the Wheat Pools affiliated with the movement was especially emphasized.

While the desirability of having all co-operative organizations linked up was stressed by different speakers on the subject, it also developed that the annual membership fee of affiliated bodies would help to solve the financial difficulties of the central office.

Houston, Texas.—Alfred E. Smith, four times governor of New York, and long the favorite son of his native state's Democracy, was nominated for the Presidency by the Democratic national convention.

A single ballot was sufficient to break through the last resistance of the group of candidates opposing him. Although at the conclusion of the roll-call of the states he was a handful of votes short of the two-thirds needed to nominate, he was so near the mark that states after state broke away from the favorite son until they had been supporting and sought in a noisy band-wagon rush to be the first to lay their support at his feet. The effect of the tabulation, after all changes of vote in favor of the New York ticket had been recorded, gave the New Yorker 53.3 of the 1,100 votes in the convention. He needed but 733 1-3 to nominate.

Announcement of the nomination was followed by a loud cheering demonstration on the convention floor, with the South people parading in the hall shouting to the skies over their happiness.

The prohibition storm cloud lifted from the convention tonight leaving a merry air of harmony in platform phrases.

### May Merge Wires and Cable Interests

Report Of Pacific Cable Conference

London.—The *Avonmouth Standard* said that it understood an announcement was being made immediately to the effect that the British Cable Corporation and the Cable Corporation of America were planning to approve a merger of wireless and cable interests. Consequently, Marconi stock rose a dollar a share on the London stock exchange, and shares of Eastern Telegraphs were also active.

Pending report of the Pacific Cable Conference, which is being held in London for some time, rumors have been spread of a huge merger of existing cable and wireless companies. The merger would be the present system of Imperial communications. Canada is interested as a part operator of the Pacific cable system, the revenue from which has in recent years been unsatisfactory.

### Jews Promise Three Millions

London.—The Jews of the United States were pledged to raise annually a minimum of \$3,000,000 to make up for the next five years the annual loss of the Jewish community in Palestine. This was done in accordance with the terms of the mandate of the League of Nations entrusted to Great Britain. \$650,000.

## Co-Operative Union Wants Wholesale Society To Cover All Of Canada

The resolution as passed follows: "That the appeal be made to the societies that was made last year in order to increase the efficiency of the Union, and that the various co-operative marketing organizations be invited to affiliate with the Union."

One delegate put a motion suggesting that the fee of the wheat pools be placed at one cent per member. This motion was never put to a vote. One fraternal delegate representing the U.F.C., contended that it appeared that the invitation to the pools to affiliate was for the express purpose of financing the Union.

The only co-operative organization holding membership in the Union is the United Grain Growers. It was stated by Secretary George Keen as a result of a question asked by J. H. Weyburn, vice president of the Saskatchewan Wheat Pool, Mr. Weyburn in reply to a question asked, said he did not think the fact that the U.G.G. had membership in the Union could be considered an obstacle to the Pools becoming affiliated. He did not, however, give any indication that the pools would join.

A resolution asking enactment of legislation providing administrative machinery to include annually, financial and business statistics of co-operative societies in their respective provinces was approved by the congress.

## Canadian Arctic Explorer Heads Expedition For Purpose Of Locating the Magnetic Pole

In quest of treasure relics and to conduct important Arctic research work, Major L. T. Burwash, veteran Arctic explorer, engineer and Canadian government official, will leave shortly on a 5,000 mile jaunt to lead the magnetic pole.

Travelling by rail, boat and dog team, Major Burwash will traverse nearly 900 miles of icy Arctic waters, with only native Eskimos, a stry trapper or fur trader, to assist him to navigate a forty foot government launch. His destination at the magnetic pole cannot be reached until late in September or October. His task will not be completed before the autumn of 1929.

At the top of the world, Major Burwash will make a scientific examination to determine the extent to which the magnetic pole has shifted since Amundsen made his investigation about 1808. Each year the magnetic pole varies in a variable direction; and its present position, once secured, will be noted on the charts of mariners who ply the seven seas.

Records of the life of the expedition of Sir John Franklin—central figure in the chapter of Arctic exploration in the nineteenth century—will be sought by Major Burwash. The two ships "Erebus" and "Terror," carrying the Franklin party, met disaster near the magnetic pole in 1845. Some of the records were found on Boothia peninsula; and it is said that one of these ships may be seen in the Arctic ocean somewhere near King William Island or Boothia Peninsula. If this theory is found to be correct, the ship may be lifted to obtain for Canada the invaluable records and relics believed to be aboard her.

Conditions among the Eskimos south of the districts of Mackenzie and Keewatin will be examined by Major Burwash; and his survey in that district will be the first since the care of the Eskimos was transferred from the Indian department to the North West Territories and Labrador early this year. An examination of navigating conditions in Franklin Strait and Peel Sound will be made; and, in addition, Major Burwash will investigate the proposed tractor-trail route from Wager Bay on the west coast of Hudson Bay to Cockburn Bay south of King William Island.

### Use Modern Methods

Birds Tied On Airplanes and Horses On Motor Trucks

Airmen find that birds are not afraid of airplanes as they used to be. Now the birds make use of them to help them along in their flights. It is not uncommon, air-planes flying over a flock of birds heading a ride, all comfortably settled on the machine and being relieved of much effort and fatigue on a long flight.

Not long ago we saw two horses being loaded to make a journey to a swifter pace than any horse ever travelled before. They seemed interested in the scenery. —Casper's Weekly

### To Preserve Children

Take one large grassy field, one half dozen children, two or three small dogs, a pinch of brook and some pebbles. Mix the children and dogs well together and put them in the field, stirring constantly. Pour the brook over the pebbles and sprinkle the field with flowers. Spread over all a deep blue sky and take in the hot sun. When browned remove and place in a bath tub to cool. —Health Bulletin.

First Lamb: "Do you suppose it's safe to go into that lawn while the dog's asleep?"  
Second Lamb: "Well, I wouldn't gambol on it."

"Look here, why are you following me about all day?"  
"For protection, my wife has threatened to beat me!" —Buen Humor, Madrid.

W. N. U. 1710

### A YOUTHFUL RULER

Marianda Sydney, 12-year-old son of the late Rajah of Pudukotai. The rajah died recently of internal complications in the American hospital at Neuilly, Paris. The rajah was 50 years old. He was the ruler of the Indian province of Pudukotai, but his residence in Cannes, while his brother acted as his regent. Marianda Sydney will assume the position held by his father.

### Turning the Tables

Automobiles Receive Bill For Damage Done To Locomotive  
Tony Straker's warning to automobile owners is that when driving your car into a railroad train be careful not to damage the locomotive.

Tony's car and a Grand Trunk train were involved in an argument over the right-of-way at Western Avenue near 104th Street, Chicago, last November. The automobile wound up in a ditch in a state described by wreck writers as "twisted wreckage."

Recently Tony got a letter from the Grand Trunk Railroad. It made no mention of his automobile, confining itself to the following succinct sentence:

"Inclosed please find bill for \$29.18 for damage to our locomotive No. 0188."

### Getting Over the Difficulty

A man who had great difficulty in spelling words that had "ei" and "ie" in them mentioned the matter to a friend.

"Oh," said the friend, "I have a splendid remedy for that. It's infallible, too. I've used it for years and never been let down yet."

The first man expressed his delight and interest, then waited for enlightenment.

"The rule is this," the friend declared: "Write your 'i' and 'e' exactly alike, and be sure and put your initials between the pair of them."

### Not Much Competition

"The immigration official was examining an Englishman on his arrival in New York. 'And what do you propose to do now you are in the United States?'" he inquired.

"Oh, I don't care," replied the Englishman heartily. "Anything I like to do is for sale, from airplane goggles to a commercial ship. The shop maintains hangers on Long Island with a corps of instructors to teach those who make purchases."

Up-To-Date Shop.  
Fifth Avenue, New York, has a shop dealing exclusively in aviation products and accessories. Everything is for sale, from airplane goggles to a commercial ship. The shop maintains hangers on Long Island with a corps of instructors to teach those who make purchases.

The keener the critic the more cutting the criticism.

### ALL FOODS CONTAIN WATER

Body Gets Sufficient Even If People Drink Little

Water is absolutely essential if the body is to keep up its activities. It is necessary not only to aid in building up the tissue, but in order to permit the carrying on of all of the chemical and physical functions that take place.

Most of us get more water than we drink as such through the fact that practically every food substance contains some water and most of the beverages are practically entirely water. Milk contains 88 per cent. water, wines anywhere from 80 to 90 per cent., and even distilled alcoholic drinks are usually more than one-half water.

If both food and water are withheld, life cannot be prolonged for more than eight or ten days. With air and water life can be prolonged for a considerable time, even though food is not given. Professional facturers always drink water during the starvation period. Some of them carry on from three to five weeks without food.

Milk is probably the best of all beverages, particularly when it is taken from properly inspected cows under sanitary conditions, transported under clean conditions to the place where it is used, and pasteurized in most instances before use. Lemonade and other drinks made from citrus fruits are excellent because they counteract acidity in the body and serve as a valuable source of vitamin C.

Tea and coffee are good beverages if taken in moderation; if taken in excess, overstimulation may result due to an overdose of the drug called caffeine, which has the power of stimulating the higher centres of the brain. Tea varies in its qualities according to the manner in which it is prepared.

One expert recommends that the proper way to make tea is to pour it off the leaves after five minutes, putting it in another warmed teapot.

Soda water, pop and similar beverages have a certain value; due to the amount of carbonate they contain. —Dr. Morris Fishbein

### Sure To Be Successful

It is yearly becoming more difficult to persuade young doctors to practice in the country. Young doctors who have plenty of courage and are determined to succeed and who go to settle in the country and practice their calling there in an intelligent manner make a quicker and bigger success than three-fourths of their colleagues who have settled in the cities. If they do not actually attain great fame, which is reserved for a few, public life often takes hold of them, bringing honors with it.

### Must Have Been Some Clock

The Provost of the little Scottish town was noted for his unhappy choice of phrases, but he excelled himself on the occasion of the presentation of a clock and a purse to a local resident who was leaving the town.

"The contents of the purse," said the Provost, "will in time inevitably disappear, but," he added, placing his hands on the clock, "here is something which will never go."

### PREMIER OF NEWFOUNDLAND

Hon. W. S. Moore, premier of Newfoundland, is to resign office next month, it is reported. Pending a general election in the fall he will probably be succeeded by Sir John Bennett, colonial secretary.

### Asphalt Highway Across Canada

Union of Canadian Municipalities Has An Ambitious Program

Immediate construction of an asphalt highway right across Canada urged at the 28th Annual Convention of the Union of Canadian Municipalities at Winnipeg. Dominion and Provincial Governments will be memorialized as to the necessity for such a road. It is estimated that the cost would be \$50,000,000 and construction would occupy five years. It would afford to motorists access to much of the most beautiful scenery on the continent, and in view of the vast number from the United States who are now touring in Canada each year the summer expenditure would not be without direct financial returns.

### Developing Tail Industry

Establishment Of A Manufacturing Plant In Calgary Is Being Considered

National Tail, Limited, is considering the establishment of a manufacturing plant in Calgary to utilize the raw tail deposits of the Rocky Mountains. About seven miles of the new road up the Red Earth Valley from Massiv to the blue tail property on Red Mountain were constructed last summer and work is again proceeding with the idea of completing the road by August. Production will be started on the blue tail property as soon as weather conditions permit. The American Lava Corporation of Chattanooga, Tennessee, are reported willing to purchase all of this year's production of the plant.

### Spain Inures Travellers

Beginning July 1, all persons travelling by rail or water in Spain will be insured against accident, the cost being added to the price of boat or train tickets. The insurance covers injuries to passengers first and carrier employees next. Proceeds will be devoted to an agency promoting sports in Spain.

Footprints, taken on the lines of our fingerprint system, are now being used for identifying criminals in Ceylon.

## Geographical Misconceptions That Have Retarded The Development Of Canada

### Long-Waited Slip-On Dress

Long-awaited slip-on dress, with open neck and diagonal pin tucks. One-piece, long drape-front dress with short sleeves. Attached collar. Separate belt. Two cascade trimming pieces attached to left side of waist and skirt. For ladies and misses.

Size 26 requires 3 yards 26-inch material with long sleeves. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

### How To Order Patterns

Address: Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg

Pattern No. .... Size ....

Name ....  
Town .....

The fact that Nero was a fiddler instead of a saxophone player would have been some satisfaction to the Romans.

Great political reforms are set in motion by the hand that rocks the cradle.

### German Hax Gargoyles Clock

Stettin, Germany, the home town of Otto Petzer, the great runner, has one of the most unique tower clocks in Germany. In the centre of its huge dial there is the terrifying face of a bearded man who every second rolls his eyes from right to left like a bogey man. In his open mouth he holds a metal plate on which the day of the month is recorded. The clock bears the inscription 1756.

### Calgary Flying Field

The City of Calgary has decided to purchase a flying field on the north hill, almost overlooking the Bow River. It affords an ideal jumping off place for aircraft. View from observation from airplanes is the latest device under construction by the Alberta government. Fields infested with sticks and stones are consequently discernible from the air from their contrast with clean fields.

### FOLKSONG AND HANDICRAFT FESTIVAL

This orchestra playing Ukrainian airs, the members of Ukrainian origin and arrayed in peasant costume of that country, made a great hit at the New Canadian Folk Song and Handicraft Festival, held at the Royal Alexandra Hotel, Winnipeg, from June 19 to 23. Over 400 performers, representing different European nationalities, participated.

## The Farm As An Industrial Adjunct

Edison Thinks Farm Should Produce Something Besides Food

The common conception of the farm is that it is designed solely to produce those things by the consumption of which we are enabled to live. Having fulfilled that purpose, there is no other aim or purpose for the farm.

But Thomas A. Edison advances a new thought in this connection. He says the farm should be made an industrial adjunct as well as a food producing medium. "We over-produce food," says Mr. Edison, "and prices are too low to give the farmers a profit. So the extension of non-food uses for farm products is a sound, practicable and important idea."

Just now Mr. Edison is experimenting with some hundreds of wild plants that will grow in various parts of this country, to test their rubber-producing qualities. Up-to-date he has collected some 1,000 of these, the seeds of 1,400 will be shown in his experimental plot of nine acres. So far it has been found that 80 of our wild plants contain rubber. At least twelve of them, says Mr. Edison, will grow on the southern coast of the island without injury by frost. Golden rod, plantain, and others grow wild in nearly every state, is one of the best sources of rubber that I have found among native wild plants," he announces.

One does not have to go further to discover the basis of Mr. Edison's thought than to note that the rubber of the farmer will be turned in the future to the production of things that are needed in the industrial field. Some advance in that direction has been made in utilizing what used to be waste material of the farm. Straw, rakes, paper, and other refuse, and even from corn stalks and, of course, we do not eat cotton or flax. However, if Mr. Edison is going to encourage the farmer to grow golden rod for its rubber, we hope that he will be able to divert it of its propensity to spread hay fever sniffles. —The Buffalo Courier-Express.

## A Great National Asset

Holiday Travel Has Increased Canada's Revenue By Millions

Holiday travel is taking a place with the Dominion's greatest national assets. According to government returns, revenue from vacationists in the Dominion grew from \$85,741,000 in 1920 to \$190,465,000 in 1928. It is estimated that in 1925 the favorable balance of tourist traffic, after deducting the expenditures of Canadians in other countries, was mounted to \$100,420,000, representing an invisible export exceeded only by Canadian wheat and newspapers. In 1927 all the provinces recorded increases in travel over the previous year, and the total revenue accruing to the Dominion from this source declared by the minister of the interior to have been approximately \$90,000,000. It is believed that the total will be doubled within the next ten years. —Regina Leader.

## Toys For Bazaar Of Nations

Carved from wood by the toy-makers of Prague, Czechoslovakia, an assortment of quaint toys and trinkets have arrived at the Red Cross headquarters at Regina. They are to be shown at the Bazaar of Nations which is being held by the Saskatchewan Red Cross Society next autumn. The consignment includes a tiny menagerie of wooden ducks, turtles, rabbits and fish, and even minute wooden ladybugs. As quaint as the articles themselves is the language in Czech which shows that "bunchees" is a ladybug and a "drevy kun" a wooden horse.

David Lloyd George first came into prominence when he campaigned against the Boer War in 1890.

Pale brown is the normal color of mourning in Persia.

"Judge: 'What about you when you marry them?' —Tyrhams, Gals.

W. N. U. 1740

## CHINESE ARE NATURALISTS

Have Greater Knowledge Of Insects Than Any Other Country

Chinese folk have many odd ways of enjoying themselves, and utilize many odd creatures and things to contribute to their ideas of pleasure. One instance that seems strange to the occidentals is that crickets should be cultivated and cared for because of their fighting powers and natural ability.

Of the many insects that are capable of producing musical sounds, writes Dr. B. Lauter, Curator of the Anthropology at Chicago's field museum of natural history, first and foremost are the crickets who during the latter part of the summer and in the autumn fill the air with a continuous concert. They are well known on account of their abundant chirping, their wide distribution, their characteristic chirping and the habit of many of them of seeking shelter in human habitations.

The relation of the Chinese to crickets and other insects presents features and one of the most striking characteristics of the most striking chapters of culture-history development. In the primitive stages of human life, insects were in the animal world. First of all, he closely observed and studied large mammals, and then to birds, fish, and insects. A curious exception to the most universal rule is presented by the ancient Chinese.

One does not have to be interested in the class of insects than in all other groups of animals combined; while mammals, least of all, attracted their attention. Their love of insects led them to observations and discoveries which still elicit our admiration. The curious life-history of the cicada was known to them in early times, and only a nation which had an intimate sympathy with the small creatures of nature was able to penetrate into the mysterious habits of the silkworm and present the world with the discovery of silk. The cicada was an emblem of resurrection, the praying mantis as a symbol of bravery, and many other insects were given a prominent role in early religious and poetical conceptions as well as in art, as shown by their effigies in jade.

In regard to mammals, birds, and fishes, Chinese terminology does not rise above the ordinary, their nomenclature of insects is richer and more colorful than that of most languages. Not only do they have a distinct name for each insect, but they have many special terms for each species for which words are lacking in English and other tongues.

## Successful Two Well

"Step this way, lay-deeds and gentlemen," barked the lecturer in the old dime museum, "and gaze upon the greatest wonder known to modern science! The ossified man, a human being perfectly formed in every respect, but who has turned to stone!"

"How did he get that way?" came a voice from the awe-stricken throng.

"Leave!" shouted the lecturer, then lowering his voice, confidentially. "Leave, did you see? He was a very busy-body man; tried to make himself solid, and over did it!"

## Canada's First Aircraft Show

The first aircraft show ever staged in Canada and one of the few ever held on the continent will be staged at the Canadian National Exhibition this fall. It was announced by exhibition officials. Details have not yet been worked out, but it has been decided that the show will differ from the aircraft exhibition recently held in Detroit in that it will be more in the nature of a series of air shows. Aircraft are being used and can be used in Canada.

## Preserved Her Memory

"How do you manage to remember so many things, Sarah?" inquired a mistress of her housemaid. Then Sarah made reply with the infallible rule for memory training.

"I'll tell ye, ma'am," said she. "All my life I've never told a lie. And when ye don't have to be taxi'n' yer memory to be rememberin' what ye told this one or that one, or how ye explained this or that, ye don't over-work it, and it lasts ye, good as new, for ever."

"I want to send Mabel something for her birthday. Not candy or anything of that sort, but something that will always remind her of me. What do you suggest?"

"Why not give her a puppy?"

"My name's Cadgett—and yours?"

"Jones."

"I'll have a letter in my old home town by that name."

## Illustration Stations

Total Of 195 Stations Are Now In Operation

The Illustration Stations Division of the Experimental Farm reports an increase for the fiscal year ending March 31, 1928, of 46 stations, bringing the total up to 195. From these stations last year there were sold to farmers in the vicinity of 50,942 bushels of seed grain, 11,892 bushels of seed potatoes, 20,080 lbs. of grass and clover seed, 200 bushels of beans and 100 bushels of peas, 682 pullets, and 1,528 chickens of eggs.

These illustration stations are chosen by Experimental Farm officials in districts where it is felt it will be of advantage to introduce in a practical way the work being done by the Experimental Farm. The owner of the farm continues to operate but does so under the supervision of an expert appointed by the Dominion Department of Agriculture. By this system each station becomes a centre for the growing and distribution of high grade seed, pure bred live stock, and also as a demonstration station for the best type of cultural methods.

One of the outstanding accomplishments of the Illustration Stations is the production of clover seed. Some 100 acres of clover have since been sown in British Columbia and was harvested last year at the Prince George and Salmon Valley stations.

## Standardizing Honey

Preparing Grades For The Better Merchandising Of Product

The Dominion Department of Agriculture in co-operation with the handlers of honey are engaged in the preparation of grades for the standardizing of honey. It is intended that these grades apply right to the export trade.

Canada exports honey to the United Kingdom, France, Belgium, Denmark, Germany, Holland, Norway, Sweden, and the United States. These exports last year amounted to 1,568,712 pounds, which in four years is an increase of over 200 per cent.

Beeskeeping on a national commercial footing is practically a new industry but it is increasing by leaps and bounds. The honey crop in 1927 showed an increase of 77 per cent. over 1926 and now stands at 25,647,288 lbs., valued at \$3,660,829.

The Publications Branch of the Department of Agriculture, Ottawa, has a number of interesting pamphlets on beeskeeping which may be had on application.

## Cattle Rabbling In Northern Alberta

Alberta's far north is making progress in cattle raising. Two hundred head recently brought into Edmonton from the Peace Coulee country fetched top prices. All travelled at least one hundred miles before being loaded on the cars at Wembley, and one lot raised 40 miles beyond Dawson Creek travelled 150 miles by trail.

## Has No Finger Prints

Has Fingerprinted John M. Chinese, for a life of crime. John has been sentenced to two months for abetting. When the police went to take his fingerprints for their records they found he had no prints. Fifteen years ago, Chinese, he had been fingerprinted but had totally obliterated all the markings on his finger tips.

The man who tells you the faults of others will tell others of your faults.

## Fame Is Waning

Few First Places Left For Trans-Atlantic Flight

Whoever was sitting further back in Miss Amelia Earhart's aeroplane "Friendship" when it crossed the Welsh coast, was the 100th person to fly across the Atlantic Ocean. With the first flight by a woman, only a few secondary records remain to be made beside successive ones for distance, duration and speed.

One of the first to cross the water by air was Sir Arthur Whitten-Brown and Sir John Alcock made the first non-stop flight 1919, fifteen persons have made similar air crossings in planes.

Seventy-eight persons have flown across in airships and of these 29 are the crew of the British R-34 have made the round trip. The R-34 made the round trip in five days.

Of the non-stop aviators, Lindbergh, Byrd, Chamberlin, Brook and Post were the first to cross the water by air. Lindbergh and Alcock, The Bremen flew Westward.

Six United States Navy men crossed via the Albatross, flying the water part of the way. Four United States fliers crossed via Iceland. Some 100 aviators have since crossed the Atlantic, including the South Atlantic crossing since Captains Saccadura and Coutinho of Portugal showed the way in 1922—a flight listed in reference books. They used four aeroplanes altogether in the flight from Lisbon to Rio de Janeiro, but they flew all the way.

## Fish Of Northern Lakes

Study To Be Made This Year Of Finny Tribes In Waters Of Northern Alberta

The Port McMurray Board of Trade recently initiated a movement to have an ichthyological and hydrographic survey made of Great Slave Lake and Lake Athabasca and their connecting and tributary waters. It is pointed out that while there have been surveys of nearly every kind in the north country a good deal of ignorance exists on its fishes. It is known that in Legend Lake there are land-locked salmon, and in Lake Athabasca six species of trout and three of whitefish, but a survey is required to reveal accurately the territory's food fish and fish food.

## Making Sacrifice Complete

Unexpected company had turned up late in time for dinner and Little Lucy was told privately that she and her mother would have to have supper without oysters.

The child was very flattered at her share in this splendid sacrifice to hospitality and was apparently disappointed when she found one small oyster in her portion.

"Holding it up in her spoon she turned to her mother and in a stage whisper inquired: "Mother, shouldn't Mrs. May have this oyster, too?"

## Cruise's Island Fruitful

A recent survey of Juan Fernandez Island, on which Alexander Selkirk, the reputed original of Robinson Crusoe, lived for four years, showed the island to be one of the most fruitful spots in South America. Every imaginable plant seems to grow on the island. One Frenchman was ship-wrecked on the island forty years ago. He likes it so much that he refuses to leave.

General Manager of Radio Corporation of America declares that radio has saved the world \$60,000,000 in communication charges. But at what cost?

## INSECTS OF THE FLOWER GARDEN

Knowledge Is Necessary To Successfully Combat These Pests

While the loss in field crops annually from the depredations of insects is estimated to run into hundreds of millions of dollars, damage to garden crops is relatively no less serious. While the damage done in the field and orchards may not be as apparent to the observer it is perhaps even more annoying when it is happening to roses, lilies, dahlias, and many others of the beautiful crops of the flower garden that are continually under observation.

In combating the bugs and worms that work in garden crops, it is necessary to have some knowledge of their life history and habits. An observation of how the insects feed will help materially in deciding the proper remedy to apply. To assist gardeners to understand these matters the Department of Agriculture, at Ottawa, has issued Bulletin No. 59, entitled "Insects of the Flower Garden and Their Control," by Mr. Arthur Gibson, Dominion Entomologist. The author points out that acquiring insect knowledge is divided roughly into two classes by the nature of their mouth parts which indicate whether they destroy by eating the leaf substance or by sucking the juices from within the leaves or stems. Insects are further divided into those that are destructive and those that are beneficial and are described and definite instructions given for their control. This bulletin, which is obtainable from the Publications Branch, of the Department, will be found particularly useful to horticulturists who, at this season of the year, will find it recommended to treat the rose bud worm that does great damage not only to roses, but to dahlias, the magnolia, and the columbine, by arsenical sprays and powders, also the aphides or plant lice that yield readily to sprays of dilute nicotine.

## Many Unknown Heroes

Scientists Are Nelson Gibe Credit For Being Contagious

The men who have given themselves in the cause of science would make a noble roll of honor, though many of them the world at large has never heard but vaguely. Their deeds are not spectacular, or as a rule, set in picturesque surroundings. The imagination of all of us responds to the picture of the airman precariously poised in his frail machine over merciless waters, or the explorer isolated among the Polar wastes, fighting for his life in a blizzard. The scientist in his laboratory, however, is not so romantic. He has left his commonplace home again at night. We find it hard to realize that in the interval he may have been facing wild adventure with the courage of a Lindbergh or Scott. —London Evening Standard.

## Encourage Flower Growing

Flower exhibits of all kinds stir encouragement. They have an important part in the life of the community, because they stimulate the development of lovely lawns and gardens and when you have thousands of citizens working along these lines, the general improvement of the appearance of your community must be marked.

## Upkeep Of Mental Hospitals Is Costly

Reaches Nine Million Dollars Yearly In Canada, Says Dr. Hicks

"In Canada there are more people in mental hospitals than there are in all the general hospitals put together," declared Dr. C. M. Hicks, medical director of the Canadian National Institute for the Mentally Ill, during an address at Edmonton recently.

Continuing to quote from figures which he has compiled during ten years of experience with mental hygiene work, Dr. Hicks stated that at present there are 24,000 people in mental hospitals in Canada, and an equal number suffering from severe mental disorders are scattered among the various communities. Between fifty and seventy-five million dollars is invested in mental hospitals in Canada, making the annual upkeep of these institutions about nine million dollars a year, or a dollar a head for each Canadian. In addition to the mental hygiene, there are approximately 60,000 mental defectives in Canada, and many thousands more are suffering from nervous diseases.

The speaker strongly condemned the general attitude of normal people towards the insane, pointing out that insanity or mental disease was no more of a disgrace than any other physical ailment, and that it was, in fact, a disease which, if properly treated, might have been successful.

The issue here not a single symptom of mental disease has been experienced, in a milder form. Delusions correspond to the prejudices which many tenaciously retain in the face of the most convincing proof that they are wrong. Negativism, doing exactly the opposite of what they are asked to do, is a common trait to the highest possible degree.

## Relic Of Roman Era

Stone Sack Is Interesting Curio At Oxford Museum

Among the interesting curios to be found in the museum at Oxford, England, is a huge stone sack. It is carved as though fresh from a man's back; it bears the mark of a rope which once encircled it in two places, and has the usual prongs at the mouth, where the string once secured the opening. All over the stone can be seen the marks of the coarse lacing which once covered it. Its history is curious. Some years ago it was found in the Thames below London Bridge, where it must have lain for centuries. Some workmen in the time of the Romans were carrying this sack of cement from a boat to the shore, when the burden slipped from its shoulders into the water. There, under the action of the water, it became solid, and as years passed away, the sack at last rotted off, leaving only the hardened cement within.

## Rubber Trees Vary In Yield

Experiments with rubber trees in Haiti show a wide variation in the yields of trees. The experiments, which were conducted under Government direction, revealed a difference that ranged from less than a thousand cubic centimeters of milk for a single tree in a given period to more than 10,000 for another tree in the same period.

## Putting It Strong

A colored preacher was trying to explain the fury of hell to his congregation. "You all is seen meltin' iron runnin' out from the furnace, ain't you?" he asked.

"The congregation said it had."

"Well," the preacher continued, "dey uses dat stuff for ice cream in de place what I'm talkin' about."

Six hundred churchmen in Persia are organizing to form a tourist agency.

"I am very nervous. I want a companion who will not answer me back."

"I have just what you want a former telephone operator." Ray Ellis, Paris.

"I am very nervous. I want a companion who will not answer me back."

"I have just what you want a former telephone operator." Ray Ellis, Paris.

"I am very nervous. I want a companion who will not answer me back."

"I have just what you want a former telephone operator." Ray Ellis, Paris.

"I am very nervous. I want a companion who will not answer me back."

"I have just what you want a former telephone operator." Ray Ellis, Paris.

WORLD HAPPENINGS  
BRIEFLY TOLD

The new German dirigible, LZ-127, may make a trip to East Asia by way of California.

Miss Mercedes Gleffe, London stenographer, failed in an attempt to swim the Irish Channel to Great Britain.

Assurance that representations made on behalf of the blind in Canada will receive government consideration has been given to a delegation of blind persons by Hon. J. A. Robb, Minister of Finance.

The King has approved the appointment of Sir John Middleton as Governor-General and Commander-in-Chief of Newfoundland, in succession to Sir William Allard, whose term has expired.

The University of Wisconsin, at Madison, gave recognition to the attainments of its most celebrated former student, Col. Charles A. Lindbergh, by conferring the honorary degree of Doctor of Laws. Lindbergh arrived there by plane.

Fritz Von Opel's rocket car, the Rak-S, was wrecked, but not until after it had attained a speed of 153 miles an hour. This is claimed as a world record on rails. There was no driver in the car.

England's most picturesque visitor, Sir Offit Atta, blue-black potentate of Akim Abukawa, has received from the King at Buckingham Palace the accolade of his new British knighthood.

Col. Charles A. Lindbergh carries a blanket public liability aviation insurance policy to the amount of \$100,000 on any airplane piloted by him. The policy also covers him for property damage.

Fur-bearing animals in Ontario are growing scarcer each year, as frontiers of civilization move forward. It is indicated in a statement issued by the Department of Fish and Game, which shows that rookeries received last year totalled \$12,702, compared with \$130,770 in 1926. With the trapping of beaver eliminated the amount is likely to be still smaller for 1928.

## How Far Voice Will Carry

Depends On Atmosphere, Wind and Competing Notes

The distance to which a man's voice will carry depends upon many different circumstances. The condition of the atmosphere is one—dense will slow down the sound waves, while a dry, crisp air will forward them easily. Wind is another factor—so is the height of the speaker in regard to the number of objects, rocks and so on in front of him. The number of competing noises also has to be considered. Under ordinary circumstances, few voices will carry intelligibly much over a couple of hundred yards, but this distance has been far exceeded with exceptionally favorable conditions. In the stillness of the frozen North, for instance a voice will carry for over a mile. Another case, as rendered from a mountain top, was once heard at a distance of four miles.

## Question Of Relationship

In a recent court case at Toronto, a nice question in relationships was propounded. The plaintiff, a woman, was testifying against a chauffeur "I'm not your brother-in-law," she was asked by counsel. "Didn't you say he was?" "No, I said he was my husband's sister's husband's brother." The counsel gave up any more questioning on this point.

It has been estimated that a hospital doctor waits an average of 13 miles a day in the course of his duties; a ship assistant eight miles; a waiter 12 miles, and a tram conductor seven miles.

Raw recruits are probably so called because they are not accustomed to fire.

Mistress: "Is there anything you require from town?"  
Maid: "Yes, the china will not last us over Sunday." Kasper, (Stockholm).

W. N. U. 1740

## Farmers' Marketing Tour

Canadian National Railway Tour  
To Great Britain and  
Denmark, 1928

New experiences awaited the tour the following day as the guests of the Port of London Authority, were taken to see something of what London's handling facilities are. It was not possible to see more than a small part, for the Port of London, in one year, handles merchandise to the value of hundreds of millions of pounds sterling. For example, the imports and exports passed through the port in 1926 totalled in value \$3,500,000,000 and included 65,000,000 bushels of wheat. In the same year 50,000,000 tons net register of shipping entered and left the port. Walking through one set of show-rooms, ten acres in extent, we visited the Ivory Room, where we were introduced to see a perfect specimen of pre-historic mammoth tusks 11 feet long, weighing 183 pounds, and having an estimated age of 50,000 years. In the State Room \$250,000 worth of paper was shown, and an interesting exhibit was a 28 lb. weight floating in a bath of mercury. The Wool Room which contained a number of bales of Canadian wool stores in a single year nearly 2,000,000 bales.

Another interesting warehouse was the Iodine Room, holding 25,000 small hide-bags of iodine, every cwt. worth \$500. The hide covering is necessary for the iodine, the effect of iodine which destroys the weeds.

Another interesting warehouse was the Iodine Room, holding 25,000 small hide-bags of iodine, every cwt. worth \$500. The hide covering is necessary for the iodine, the effect of iodine which destroys the weeds.

Port wine vaults. Before descending to the cellars we were handed off torches fastened to the end of staves. Torches such as these have been used since 1250 years. The temperature of the vaults never varies more than 55 degrees. The effect of regulating it, yet the only means of regulating it, are incandescent lights, and the amount of sawdust on the floor. Put into the vaults on the roof of the cellars by the fumes of the wine is a curious fact. In the brandy vaults this fungus is absent. Twenty-two thousand pipes of wine, each in 1909 can be accommodated in these vaults which have twenty-two hundred feet of runways, apart from the vast stores of spirits contained in the vaults not included in the day's itinerary. Again in the open air we were headed a launch on route to the S.S. Minnewaska, where we were to be lunch.

The chairman of Lord Ritchie of Dundee. The novelty of luncheon on the beautiful ship, surrounded by great liners from almost every continent in the world made a deep impression. This was followed by a river party.

In the evening we were the guests of the Empire Marketing Board at dinner in the Hyde Park Hotel and had an opportunity of learning at first hand the work of the Board, done by this organization to encourage the consumption of products produced within the Empire. The sum of five million dollars per year has been placed at the disposal of Parliament to further the marketing of Empire products. The Board is a non-party body and includes representatives of the Dominions and Colonies. Agriculture is also an important phase of its work. The chairman of the Board, Lord Lothian, told us something of the work of the Board, which was further explained by Sir Halford Mackinder, chairman of the Imperial Economic Committee.

The next day's programme provided one of the most interesting moments of our stay in London. This was a visit to Tower, a firm fortress which we entered with mixed feelings, for here and on Tower Hill perished some of the most renowned men and women of their day. Here the beautiful Anne Boleyn was beheaded, and here Lady Jane Grey saw the headless body of her husband carried past her on the morning when she knew that she was to die. Cranmer, Sir Walter Raleigh and the little Princess met their tragic fates, and though these things happened in the days gone by, one feels the Tower to be sinister still. Even in our own time it was not chosen as the place in which the spies in the Great War should meet their doom.

We were admitted by Yeoman of the Guard "Beheading" who also wear the quaint uniforms which were adopted in the time of Henry VIII. We were shown the Bloody Tower, where the bones of the two murdered Princes were found and the room reconstructed, in which Sir Walter Raleigh, when he wrote his History of the World.

In the White Tower we saw the chamber in which Guy Fawkes and his fellow-conspirators were tortured in 1605. Here too were the apartments occupied by Queen Elizabeth when she herself was a prisoner in the Tower. We saw the Black and execution axe, one of which has a nick in the blade where it struck the neck of a victim. And then, how close to our Canadian hearts it came, we saw the cloak on which Wolfe died on the Heights of Abraham.

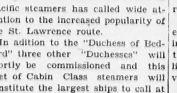

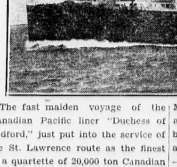

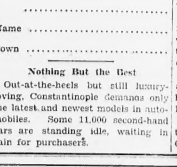

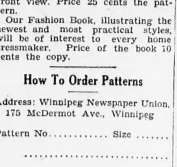

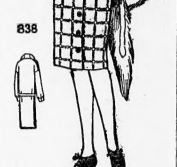

Many quaint forms are still retained in the administration of the Tower. The gates are shut at midnight and the accompaniment of ancient ceremonial and after midnight no one may enter the precincts without giving the password.

In one of the strong rooms of the Tower there repose the Crown Jewels, including the crown of King George and Queen Mary, a display of the jewels of the British monarchy.

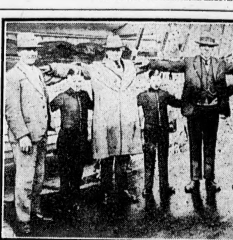

The Tower of London was built by William the Conqueror, and it is said that the site on which it stands was selected by Julius Caesar as a location for a fortress. One of the most interesting features of the Tow-

er is the portcullis, said to be the oldest one in existence in working order. On the way to the Tower, we stopped at St. Paul's Cathedral, Sir Christopher Wren's masterpiece, but, owing to the closing operations of the piers which support the great dome, it was not possible to see its interior to advantage, most of it being boarded up and inaccessible. Thus, we did not see the crypt or enter the Whispering Gallery.

(To Be Continued.)

## STALWART HEBREIANS

Three stalwart crofters, all over six feet in height, who left the Hebrides where they "acrate a bare living; by tending sheep," to settle in Ontario. They reached Canada last week in high spirits. The picture shows the cabin boys comparing their stature with the settlers aboard the *Insar-Lettia*, on which the Hebreians arrived in Canada.

Recipes For This Week  
(By Betty Barclay)

**FRIZZLED BEEF FOR HOT DAYS**  
Melt butter in hot frying pan, add minced onion, and cook until onion is tender. Add beef, and cook until beef is tender. Add salt and pepper to taste. Serve with mashed potatoes.

**ORANGE AND RHUBARB SAUCE**  
2 pounds rhubarb.  
2 oranges.  
1½ cups sugar.  
1 tablespoon granulated gelatin.  
1 tablespoon cold water.  
Wash rhubarb, cut into thin slices; peel oranges, removing membrane with peel, cut in small pieces; put rhubarb, orange, and sugar in an earthenware or glass baking-dish, and bake about one hour. Dissolve gelatin in cold water, add to rhubarb mixture, and when cool, fill individual pastry shells with sauce, and decorate with whipped cream, forced through pastry bag and rose tube.

**One-Piece Dress**  
One-piece dress, closed front in coat style, lined with convertible collar, forming revers. Drooping shoulders, forming short kimono sleeves. Long sleeves that are gathered into wristbands and finished with turn-back cuffs may be substituted. Patch pockets and removable belt. For ladies and misses.  
Size 16, 18, 20 years; 34, 36, 38, 40, 42, 44 inches bust.  
Size 36 requires 3½ yds. 40, 42, 44 inches bust.  
32-inch contrasting material for trim front. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles will be of interest to every home dressmaker. Price of the book 10 cents the copy.

**How To Order Patterns**  
Address: Winnipeg Newspaper Union,  
154 McDermott Ave., Winnipeg  
Pattern No. \_\_\_\_\_ Size \_\_\_\_\_  
Name \_\_\_\_\_  
Town \_\_\_\_\_

**Nothing But The Best**  
Out-of-the-herd but still hungry-looking, Constantine (demeanor only) the latest and newest models in automobiles. Some 11,000 second-hand cars are standing side, waiting in vain for purchaser.

**POPULARIZING THE ST. LAWRENCE ROUTE**  
The fast maiden voyage of the Canadian Pacific liner "Duchess of Bedford" was so successful that it is now possible to travel from Liverpool on one Friday and in Montreal the following Friday—an unique service for the St. Lawrence route.

Excellent appointments and furnishings, the "Duchesses" open a new era in Cabin Class travel and experienced travellers who have seen the new liner compare it favorably with first class ships. Six hundred feet long, two-hundred-

ed, oil-burning and 75 feet wide, the new liner has broad deck spaces and many marine innovations, all conducive to passenger comfort. She is commanded by Captain H. Sidwell, R.N.R., whose 21 years in the service of the Canadian Pacific Steamships have taken him through the seven seas. He was formerly in command of the "Minneapolis" and "Montreal," having been in charge of the latter on several cruises, and through the West Indies a feature to be repeated by the "Duchess of Bedford."

Montreal. Toronto, Hamilton, Ont., Winnipeg, Regina, Moose Jaw, Saskatoon, Calgary, Edmonton, and Victoria, B.C.  
Clubs in process of organization are located at:  
Halifax, Saint John, Quebec, Kingston, Ottawa, London, Peterboro, St. Catharines and Walsworth, Ont.

## Canada's Flying Clubs

Eleven Already Established and Ten More Being Organized

Hon. J. L. Stinson, Minister of National Defence, has opened the new flying field of the Granby Light Aeroplane Club, Granby, Que.  
Canada now has 21 light aeroplane clubs, extending from Quebec, to Victoria, B.C., with ten others in process of formation. Fourteen such planes have already been allotted to these organizations by the Government under the conditions governing the issue of these machines. Additional to the Granby clubs, those already formed and with whom agreements have been signed by the Minister of National Defence are:

Montreal, Toronto, Hamilton, Ont., Winnipeg, Regina, Moose Jaw, Saskatoon, Calgary, Edmonton, and Victoria, B.C.

Clubs in process of organization are located at:  
Halifax, Saint John, Quebec, Kingston, Ottawa, London, Peterboro, St. Catharines and Walsworth, Ont.

## Alberta Act Invalid

Privy Council Upholds Ruling of Supreme Court of Canada

Both the appeal of the province of Alberta and the counter appeal of the Dominion of Canada from a Canadian Supreme Court decision respecting the question of whether the right of the Crown upon intestacy is in the province or Dominion right were dismissed without costs by the judicial committee of the Privy Council. The case involved the validity of the *Ultimate Heir Act* of the legislature of Alberta.

The judgment of the Privy Council upon the ruling of the Supreme Court of Canada that the *Ultimate Heir Act* of Alberta is invalid. The Act provides that where a person dies without legitimate heirs, the property goes to the University of Alberta.

## Receives Large Salary

Chief Harpowner Earned \$80,000 In Nine Months

Few occupations tax the nerves of man more than whale hunting, but few occupations pay better. When the whale-hunting fleet recently returned from the Antarctic after a nine-months' cruise, the chief harpowner had earned \$80,000 in nine months. He is a really good harpowner. It is upon his hope that the result of the expedition largely depends, and though his profit may seem high it is modest compared with the profit he brings to the expedition.

## Changes Name Again

Peking Will Be Known As Peiping Meaning "Northern Peace"

The nationalist government political council has decided to change the name of the historic Manchurian capital, Peking, to Peiping, meaning "Northern Peace."

The action is considered at Shanghai as an attempt by the Nanking government to destroy Peking's political importance and further that of Nanking, which they insist is now the National capital.

The announcement of the action of the council states "it is hoped Peking will continue as a centre of art and culture, but as a political centre it is dead."

## Should Be Popular

Aerial tea parties every Friday afternoon throughout the summer has been arranged by the Imperial Airways, to enable Londoners and visitors to see the Metropolis from the air. A big 21-seater aeroplane will circle above London about 36 or 40 minutes, and tea will be served.

"Now, I mean, are you telling fairy stories?"

"No. We are discussing the divisibility of the atom and the statistics of the atom—Lustige Koeler Zeitung, Cologne."

Now, I mean, are you telling fairy stories?

CALGARY, ALTA., Canada

Don. McKenzie, has taken up  
his residence in town

Miss Lorna Glover arrived  
from Calgary, on Monday.

"Is That So?" Yes it is! The  
merriest, happiest picture you  
ever saw.

Mrs. N. Bissarab, and child-  
ren, were passengers east on  
Saturday morning.

A large number from town  
attended the ball tournament  
at Bindloss, Wednesday.

Mrs. Stomley and children  
returned Tuesday night from  
visiting Mr. and Mrs. W. Wat-  
son.

Mr. and Mrs. Wesley Rivers  
returned last week from Com-  
quest, where they have been  
spending a vacation.

Mr. and Mrs. Carl Lundie,  
old-timers of this district, were  
in town over Wednesday night  
on a trip to La-Salle, Sask.

See Dan McElroy about the  
2035 Allis-Chalmers Tractor.  
Will pull 30-inch Separator on  
any Combine.

Mr. and Mrs. Roy Rivers and  
Mr. and Mrs. Harburt, sr., re-  
turned recently from an auto  
trip to the coast.

C. R. Moore, local station  
agent left on Tuesday on a hol-  
iday vacation trip, Tuesday.

Mr. Dan McElroy is entertain-  
ing her mother who arrived on  
Tuesday night's train from the  
States.

Alex. Noakes and young son,  
of Swift Current, were in town  
Tuesday. Alex. was an early  
resident of the town.

Mrs. D. McElroy and  
Mr. and Mrs. E. McGill, left  
on Wednesday, on a holiday  
trip to Victoria.

J. Ritchie, returned on Sat-  
urday night from a vacation  
spent at Oads, Alta., and nearby  
points. He reports conditions  
in that district as excellent.

## FOUND NOTICE

Estuary, Sask.

## R.M. Mantario No. 262

## NOTICE

In accordance with the provisions of  
the Highway Act, and of By-Law No.  
111 of the above-named Municipality,  
ratepayers are advised that any dirt,  
rock, fill or rubbish, which has been  
deposited on the road allowance in the  
Municipality in the event of this notice  
being given, twenty-four hours after re-  
ceipt of notice to do so, the Council will  
order the said removal and charge the  
expense of same against the land.  
C. WALKER, Reeve.  
C. EVANS SARGENT, Sect.-Treas.

## R. M. of Mantario-cont.

days at public ward rate of 2.50  
per day.

Walker—Re road diversion  
C.N.R., S.W. 34-25-26 w. 3, 1.09  
acres. That compensation at  
the rate of \$20 per acre be paid  
to the owner for acreage  
taken and damages.

Dahl—That the Dept. of  
highways be requested to ex-  
propriate roadway, N.W. 31-26-  
28; N.E. 30-26-29; N.W. 35-20-29;  
N.E. 31-26-29; S.E. 5-27-28; S.W.  
and S.E. 4-27-28; N.W. 2-3-27-28;  
and S.E. 3-27-28, w. 3, S.W. 2-  
27-28 w. 3; as per plans submitted  
by the Municipal engineers,  
the Municipality to guarantee  
all claim for compensation and  
damages.

Batty—Petition to Dept.  
of Interior. That the Council  
approve the petition of the  
United Farmers and request  
the Dept. to act on same.

Batty—That the Secretary be  
authorized to assign all or any  
of 1920 and 1927 tax sale certifi-  
cates on hand at face value  
plus accrued penalty and per-  
centage of 1928 and other subse-  
quent taxes on assignment.

Mr. T. Mansell Leech was pre-  
sent and made arrangement for  
settlement of arrears of taxes  
on pre-emption.

Hawlin—Correspondence from  
Municipal solicitor re note L.  
Ferry Hamey. That the sol-  
icitor be instructed to continue  
action to collect.

Batty—That the Secretary  
be authorized to attend the  
Convention of Municipal Sect.  
Treasurers at Regina Aug. 15th  
Montgomery—That Thos.  
Harn be notified to remove  
gates from road allowance, N.  
10-23-27 w. 3.

That Fred Stanley be notified  
to remove gates on road E.  
7-25-28 w. 3.

Dahl—That Messrs. Sloss and  
McDonald be notified to re-  
move rocks which have been  
placed on N and S road allow-  
ance between sections 35 & 36,  
20, 27; w. 3.

And that notices be inserted  
in the Alaska, Empress and  
Estuary papers notifying all  
ratepayers to remove any rock  
or obstruction placed on road  
allowances, failing which the  
work will be done by the Mu-  
nicipality and charged against  
the land adjoining.

Kinch—That Cn. Dahl be De-  
puty Reeve for the months of  
July, August and September.

Walker—That a special meet-  
ing be held at the Orange Hall  
July 26th, at 10 a.m., to consider  
tenders for grading, leveling  
and clay surfacing one mile of  
road N of 35, 16, 28, w. 3.

To submit to the council a  
statement of all persons in

arrears for taxes on unpaved  
land, and make arrangements  
for the collection of same this  
fall, by distraint if necessary.

Council adjourned at 5 p. m.  
to meet again at Orange Hall,  
July 21st, and for the next reg-  
ular meeting at the school,  
Mantario, August 4th

## Brooder Chick Management--continued.

tionally before the chicks from  
the start, and that of restrict-  
ing the amount of mash  
consumed at any one time by  
closing the hoppers for diff-  
erent periods during the day. In  
one experiment considerably  
greater gain per chick and  
slightly greater mortality  
was experienced when mash  
was left before the chicks con-  
tinuously. In another experi-  
ment of one week's duration,  
the chicks having the mash  
always before them made  
double the weight gain, with  
less mortality in three weeks  
of age than those birds receiv-  
ing mash six times a day for  
half hour periods. In other  
words the practice of limiting  
the feeding period of brooder  
chicks for the purpose of con-  
trolling over eating was detri-  
mental to health and growth,  
rather than advantageous.  
When the enormous amount  
of extra time and labour re-  
quired are taken into consideration,  
it is without doubt poor economy  
to use the intermittent method  
of feeding.

## Mortgage Sale Of Valuable Farm Property

Under and by virtue of the Power of  
Sale provided by the Land Titles Act,  
made certain title which will be  
produced at the time of the sale.  
There will be offered for sale by public  
auction at the front of the Hotel in the  
Town of Empress in the Province of  
Saskatchewan, at the hour of 2 o'clock  
in the afternoon, the following prop-  
erty, namely: The south east quarter of Sec-  
tion Thirty-five (35), in Township  
Twenty-three (23), Range Two (2),  
West of the Fourth Meridian, containing  
160 acres more or less, EXCEPTING  
and RESERVING such exceptions and  
reservations as are expressed in the ex-  
isting Certificate of Title or may be im-  
plied in connection therewith.

Terms of the sale to be 30 per cent.  
cash at the time of the sale, and the bal-  
ance according to the terms and con-  
ditions to be made known at the time of  
sale or upon application to the vendor's  
solicitors.

The above property will be offered for  
sale subject to a sealed reserve bid, and  
free from all encumbrances, save taxes  
for the current year.

The vendor is informed that the above  
property is situated about 10 1/2 miles  
from Empress, and that there are one  
hundred and forty acres cultivated, house  
20 ft. x 40 ft. and barn; half mile two  
wire fence.

For further particulars and conditions  
of sale, apply to: MacLeod, Robertson,  
Winter & Edmondson, Calgary, Alberta,  
dated at Calgary, this 9th day of June,  
1928.

MACLEOD, ROBERTSON, WINTER  
& EDMONDSON, Vendor's Solicitors.  
"W. FORBES".  
Registrar.

## Noxious Weeds

Your co-operation with Provincial and Municipal  
authorities is solicited in the control and eradication of  
weeds. Keep your fields and road sides free from these  
unsightly and costly pests.

Weeds reduce the yield and lower the grade of  
your grain, rob the soil of its fertility and cost money  
in dockage and transportation. Approximately  
6,000 cars were required to haul the screenings from  
one season's crop in Western Canada to terminal  
markets. Will you not help to reduce this enor-  
mous loss?

Give your local weed inspector and the Provincial  
Field Supervisor in your district every possible support  
in dealing with the weed problem.

FIELD CROPS BRANCH,  
Alberta Department of Agriculture

## ANNOUNCEMENT
